Minny 430-530 B - 500 E

Minny scrubbing machine. Suitable for maintenance cleaning of small to mid-sized and irregularly-shaped areas

Minny is an extremely quiet machine and therefore suitable for schools, hospitals and retirement homes since it complies with the strictest standards on noise pollution. Suitable for maintenance cleaning, this machine can perform good thorough cleaning by means of aggressive brushes or abrasive pads.

The shock-resistant high-density polyethylene recovery tank is also removable for easier cleaning

Mিনny scrubbing machine with a single brush

The single brush version, with batteries or 220-230 V power supply.
Mিনny's characteristics have been studied to make all working operations easier:

- Machine preparation
- Battery check
- Brush couple/uncouple
- Squeegee adjustment
- Cleaning operations at the end of work

The water filling inlet is easily accessible and shaped to prevent splashing and equipped with a filter system that holds back any impurities

The easy-to-reach spacious battery compartment can house two 12 V/77 Ah gel batteries that require no maintenance or wet cell 105 Ah batteries

The washing unit of Minny 430-530-500 uses a single brush with a practical brush lock/unlock system requiring no manual intervention for installation. A brush stop system prevents the brush from coming unlocked when moving from one place to another

Both inclination and pressure of the squeegee rubber can be adjusted. The squeegee is fitted with two wheels which provide better stability during operation. The rubber elements can be used on both sides

The shape of the instrument board, made of cast aluminium and injection moulded, facilitates machine control and guarantees the best visibility and safety of use

Minnny 430 B / 530 B battery models are equipped with a strong gear motor that allows a prolonged use without any maintenance operations.

Minnny 500 E is equipped with an electric motor of 750 W and the brush is activated through a belt. For this reason Minnny 500 E is particularly suitable for maintenance and hard cleaning operations

TECHNICAL DESCRIPTION		Minnny 430 B	Minnny 530 B	Minnny 500 E
